

DESKSURFER NEWS

800% efficiency was achieved by a Major Swiss banking Corporation in London who hired a Desksurfer for trial on a major light change over dealer desks.

In the exercise their facilities contractor changed 80 lights in the same time it would have taken them to change 10, using their desk spanning scaffold system.

All concerned were delighted at the 800% improvement and the ease of use of the Desksurfer.

As a result the bank instructed their FM company to place an order for 2 Desksurfers.
